

Facilities Job Function

Environmental Health and Safety Technician II

Grade 51

Summary

Performs moderately complex technical duties related to the assessment of environmental conditions within the University's facilities and/or affiliated hospitals to ensure compliance with established federal, state, and University regulations.

Typical Duties

1. Measures environmental factors (e.g., pollutants/contaminants), using field or laboratory detection instruments to determine levels.
2. Monitors environmental conditions through inspection or survey.
3. Identifies and notifies supervisor about possible environmental problems and may recommend appropriate solutions.
4. Completes appropriate paperwork and issues reports.
5. Performs related job duties as required.

Typical Requirements

Education: High school graduate or equivalent and course work related to environmental science preferred.

Skills and Experience: Two to three years' related work experience preferred. Driver's license may be required (Certification may also be a requisite depending on the type of environmental factors involved).

Note: This is a model job description reflecting a sample of typical duties. It is intended to suggest a general level of skill and complexity and as such is not a substitute for the local, specific descriptions for individual jobs.
